## Foreword

### *Dear colleagues and friends,*

At this very moment you are opening the book of proceedings from the international scientific conference International Scientific Days 2018 organized under the theme: „Towards Productive, Sustainable and Resilient Global Agriculture and Food Systems“ by the Faculty of Economics and Management of the Slovak University of Agriculture in Nitra, Slovak Republic. This conference with over 250 participants from 24 countries is very good starting point for presenting new ideas or critical statements, sharing information and for establishing cooperation. International Scientific Days 2018 cover according to the OECD vision for the 21st century all inevitable topics such as food markets, water management, productivity growth and climate change.

We know that agriculture is the foundation for a promising global future. Task of policy makers, academic sphere and all stakeholders is to consider which policies could help us to feed a growing human population, protect natural resources, and support farmers and rural citizens. In the same time, business priorities for future OECD activities at the global food system are focused on the key pillars of trade, innovations in agri-food chain including faster adoption of green growth innovations, diets, nutrition aspects and sustainability as well.

International Scientific Days 2018 have been organized in partnership with ASECU, the Association of Economic Universities of South and Eastern Europe and the Black Sea Region and in the same time serves as the platform for presentation of results of two international strategic partnership projects, project SOILS “Sustainability of Small and Family Farms” coordinated by the Faculty of Economics and Management of the Slovak University of Agriculture in Nitra and project CATALYST “Capacity building in agricultural innovation services in Central Eastern European countries”

I would like to take this opportunity to thanks all policy makers, academics, researchers, managers and sponsors which accepted our invitation and became active member of the conference. My special thank belongs all of the people who made this conference successful and valuable experience for each and every one of us.
