

Median Impact Factor

1. Definícia

Median impact factor je definovaný ako stredná hodnota impakt faktora pre konkrétny odbor (tematickú skupinu).

Thomson Reuters (definícia):

The Median Impact factor takes into account all journals within a Subject Category. The journals are sorted by Impact Factor with the highest Impact Factor being treated as the top journal. The system then looks for the middle journal by Impact Factor in the journals for this Subject Category. This represents the Median Impact Factor.

2. Vyhľadávanie IFM podľa kategórie (tematickej skupiny)
